Level Allocation Test

Stellenbosch Camp 2021

Time: 1 hour

This test consists of four sections with five questions each. Each question is multiple-choice with five possible answers of which exactly one is correct. Each question is worth 1 mark; an incorrect answer or a blank response will be awarded 0 marks. No calculators or external resources may be used; a ruler and compass is allowed however. Your answers must be submitted in the provided Google Form.

This test will only be used to decide which stream at the camp you will gain the most from, and will not be taken into account beyond that.

1 Algebra

A) N

B) \mathbb{Z}

whose sum or difference is a multiple of 10?

_	4 .	Sobra									
1	1. Let x , y and z be positive real numbers that satisfy $xy = 1$, $yz = 2$, $zx = 3$. What the value of xyz ?										
		A) $\sqrt{2}$	B) 2	C) $\sqrt{6}$	D) 6	E) Impossible					
2	2. Given that x satisfies $x + \frac{1}{x} = 10$, what is the value of $\frac{x^2 - x + 1}{x^2 + 1}$?										
		A) $\frac{1}{100}$	B) $\frac{9}{10}$	C) $\frac{91}{100}$	D) $\frac{99}{100}$	E) 1					
3	3. How many roots (not necessarily unique) does the polynomial $P(x) = x^7 - 5x^3 + x + 1$ have in the complex numbers?										
		A) Unknown	B) 1	C) 3	D) 5	E) 7					
4	. Given a sequence of positive real numbers $a_1, a_2,, a_{2021}$ satisfying $a_1 a_2 \cdots a_{2021} = 2021$, what is the minimum of $\sum_{i=1}^{2021} a_i$?										
		A) $2021^{\frac{2022}{2021}}$	B) 2021	C) 1	D) $2021 + \frac{1}{2021}$	E) 0					
5	Consider a function $f: \mathbb{R} \to \mathbb{R}$ that satisfies $f(x+y)^2 = f(x^2) + f(y^2)$ for all $x, y \in \mathbb{R}$. How many possible values are there for the expression $f(x) + f(y)$?										
		A) 0	B) 1	C) 2	D) 3	E) 4					
2	Combinatorics										
1	Let $A = \{2, 3, 5, 7\}$ and $B = \{3, 4, 5, 6\}$; what is $ A \cap B $?										
		A) 0	B) 2	C) 4	D) 6	E) 8					
2	Given a set of all of the 1×1 squares on an 8×8 chessboard (each square is assumed to be unique), how many subsets of this set do not contain any white squares?										
		A) 0	B) 32	C) 2^{32}	D) 32!	E) 2^{64}					
3	3. SAMF offers Liam five payment options (A-E) for his work at the camp. These will all be in the form of a bag full of R1 coins. Each bag is labelled with a set indicating that Liam can construct a bijection between the coins in the bag and that set. Which bag is the biggest?										

C) Q

4. What is the smallest natural number n such that any set of n integers will always contain two numbers

D) Ø

 $E) \mathbb{R}$

	and b and replaces them with the single number $ a - b $. Which of the following could be the number he has on the board after 2020 minutes?										
	A) 156	B) 57	C) 48	D) 1024	E) 2020						
3	Geometry										
1	1. Let ABC and ABD be two triangles with $C \neq D$, B is the midpoint of segment CD , and $ AB = B $. What is the value of $\angle CAD$??										
	A) 72°	B) 135°	C) 90°	D) 108°	E) Impossible						
2. Let $ABCD$ be a square, and let M and N be the midpoints of BC and CD respectively. Let I intersection of AM and BN . What fraction of the square's area is $\triangle BPM$?											
	A) $\frac{1}{8}$	B) $\frac{1}{100}$	C) $\frac{1}{24}$	D) $\frac{1}{10}$	E) $\frac{1}{20}$						
3	. Consider the follow	ing five statemen	its:								
	• In non-degene	- CA .	CA .								
	• The incentre,	centroid, and circ	cumcentre of a trian	ngle are collinear.							
	• It is possible t	to divide an arbit	rary angle into thre	ee equal parts using	equal parts using only a ruler and compass.						
	• In quadrilater	• In quadrilateral $ABCD$, it is always true that $ AB \cdot CD + AD \cdot BC \ge AC \cdot BD $.									
• It is possible to inscribe a circle inside any non-degenerate triangle, and the centre of the is the intersection of perpendicular bisectors of the sides of the triangle.											
	How many of these	e are correct?									
	A) 1	B) 2	C) 3	D) 4	E) 5						
4	4. In triangle ABC , let H be the orthocentre. Let A' , B' , and C' be the reflections of H over lines E CA , and AB respectively. How many cyclic quadrilaterals are there that use only the points A , B , H , A' , B' , C' ?										
	A) 15	B) 35	C) 0	D) 4	E) 7						
5	5. Consider $\triangle ABC$ with $ AB =8$, $ BC =9$, and $ CA =6$. Let P be a point inside $\triangle ABC$ and let D , E , and F be the intersections of the extensions of AP , BP , and CP with BC , CA , and AB respectively. If $ AE =2$, and $ AF =3$, what is $\frac{ AP }{ PD }$?										
	A) $\frac{11}{10}$	B) $\frac{3}{2}$	C) $\frac{9}{8}$	D) $\frac{14}{9}$	E) $\frac{5}{4}$						
4 Number Theory											
1	1. What is the largest positive integer that cannot be written as the sum of non-negative multiples of and 13?										
	A) 119	B) 93	C) 73	D) 2022	E) 128						
2	2. How many natural numbers below 1001 are relatively prime to 1001?										
	A) 168	B) 720	C) 852	D) 900	E) 1000						

A) 5

B) 6

C) 7

5. The numbers 1, 2, ..., 2021 are written on a blackboard. Every minute, Aaron erases two numbers a

D) 10

E) 11

- 3. Consider the following four statements:
 - Every positive integer can be written as the sum of two squares.
 - If $a \mid b$ and $a \mid c$, then $b \mid c$.
 - Given $a, b \in \mathbb{N}$, we have that $lcm(a, b) = \frac{ab}{\gcd(a, b)}$.
 - All prime numbers are odd.

How many of these are correct?

- A) 0
- B) 1
- C) 2
- D) 3
- E) 4
- 4. $k \in \mathbb{N}$ is chosen such that $k^2 + 2016k + 2015$ is a perfect square. Which of the following is a possible value for k?
 - A) 1544
- B) 3471
- C) 6190
- D) 8585
- E) 9381

- 5. What are the last two digits of $7^{7^{7^7}}$?
 - A) 01
- B) 07
- C) 49
- D) 43
- E) 85
